Note: See appendix A for an explanation of terms used.

Standard Notes: - Represents zero. (X) Not applicable.
(D) Withheld to avoid disclosing figures for individual companies, (MA) Not available.

[1]Represents receipts of the mineral indicated by the industry name less minerals transferred to other establishments for preparation or less minerals received from other establishments for preparation.

[2]Represents expenditures during the year for both new and used plant and equipment.

[3]Figures for cost of minerals received for preparation are included with those for cost of supplies, purchases for resale, and purchased fuels and electric energy.

[4]Represents direct-shipping iron ore, treated iron ore for consumption, and iron agglomerates. Figures for shipments of primary products by establishments classified in other industries are included with those for shipments of primary products by establishments classified in the specified industry. Quantity represents thousands of long tons.

[5]Figures for shipments of primary products of establishments classified in other industries are included with those for establishments classified in the specified industry.

[6]Figures for primary services performed in other industries are included with those for primary services by establishments classified in the specified industry.

[7]Represents thousands of barrels of crude petroleum, field condensate, and drips shipped or used.

[8]Includes figures for minerals produced and used in the same establishment in making manufactured products. The value of such products was estimated.

[9]Excludes figures for minerals produced and used in the same establishment.

[10]Figures for the value of shipments of primary products by establishments classified in other industries are included with those for the value of shipments of primary products by establishments classified in the specified Industry. See also footnote 8.
